

# TESS™ METALSCREEN 2%

A metal-coated, fibre-reinforced polymer fabric, providing strength and stability and exceptional heat and glare reduction. This fabric is a very close weave made up from multiple very fine but varying styles of high technology polymer yarn, creating a soft textile appearance for demanding design driven applications but retaining exceptional strength for tension applications.

A textile in the true sense offering 2% direct light transmission. A stylish touch of metal coloured fleck is used to offer an enhanced visual appeal.

This fabric provides glare protection as low as  $3.0T_v$  and heat protection as low as  $0.04g_{tot}$  (externally applied) or  $0.29g_{tot}$  (internally applied), dependant on colour choice, as well as being fire rated to B1 (M1) European standard. Available in 2850mm width as standard. Other widths available on request.

Fabric samples are available on request. Minimum handling charge of £50, delivered within 10 working days, and refundable on receipt of a purchase order for the project.
