

# TESS™ SCREEN 1%

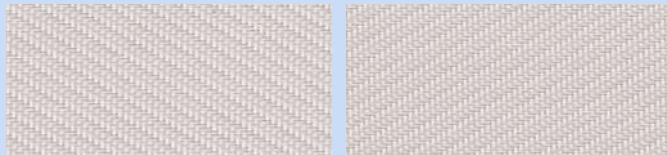

A high performance fibre-reinforced polymer fabric, for strength and stability under tension. A low openness factor of just 1% provides optimal heat and light protection whilst the composite construction offers minimal stretch characteristics at high tensile loads, giving extended life and service intervals.

This fabric provides glare protection as low as  $1.1T_v$  and heat protection as low as  $0.08g_{tot}$  (externally applied) or  $0.42g_{tot}$  (internally applied), dependant on colour choice, as well as being fire rated to B1 (M1) European standard. Available in widths of 1800mm, 2500mm and 2850mm as standard. Other widths available on request.

Fabric samples are available on request. Minimum handling charge of £50, delivered within 10 working days, and refundable on receipt of a purchase order for the project.
