

# TESS™ POLY 5%

A very high performing engineered polymer fabric. During manufacturing the material is heat treated whilst being tensioned along the warp and the weft, resulting in a fabric that is strong and remains stable whilst being tensioned.

Manufactured with end user wellbeing as a high priority, this material holds GREENGUARD® certification. Although the fabric is woven, the textile nature of the

material is minimised through heat treatment and this aids maintenance and cleaning over the life of the product.

This fabric provides glare protection as low as 3.0T<sub>v</sub> and heat protection as low as 0.05g<sub>tot</sub> (externally applied) or 0.34g<sub>tot</sub> (internally applied), dependant on colour choice, as well as being fire rated to B1 (M1) European standard. Available in widths of between 1770mm and 2670mm – please enquire for more detail.

Fabric samples are available on request. Minimum handling charge of £50, delivered within 10 working days, and refundable on receipt of a purchase order for the project.
