

TESS™ SCREENBLOCK

A high performance fabric, fibre-reinforced and with polymer laminate to provide total light blocking performance. The precise multi-layered construction offers strength and flexibility under tension as well as extended life and service intervals.

The fabric has a micron thickness backing, offering a solid light blocking screen whilst retaining fabric flexibility and the heavy textile weave pattern on one side.

This fabric provides glare protection at OT_v and heat protection as low as $0.03g_{tot}$ (externally applied) or $0.24g_{tot}$ (internally applied), dependant on colour choice, as well as being fire rated to B1 (M1) European standard. Available in 1550mm width as standard. Other widths available on request.

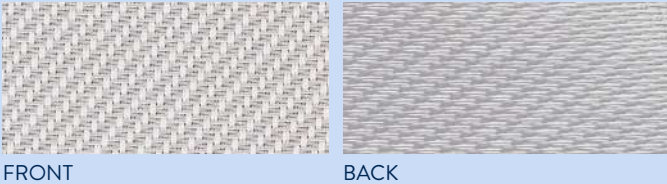

An A5 booklet of grey samples is available free of charge. Other colours or fabric size samples are available on request, minimum handling charge of £50, delivered within 10 working days, and refundable on receipt of a purchase order for the project.
